The left handles are the solution where the valves are installed on a parallel piping system.

Geomet® carbon steel 90° reverse lever

Full port	1/2"
Standard port	1/2"÷3/4"
A (inch)	3.94
Yellow Code	PLIG03
Light Blue Code	PLIA03
Light Blue SX Code	PLIA00
Material (s)	DD11 (EN10111) + PVC

We have also reverse handle: in this version the handle is parallel to the pipe when the valve is closed and perpendicular when the valve is open. This option is available on demand only in the small size for valves up to 1/2" (or 3/4" for reduced bore)

Stem flats show actual ball position

Aluminum - brass - Geomet® carbon steel T-handle

Corrosion is a big problem that many have to face when using valves in underground or outdoor installations, especially near sea, or when valves are used in swimming pools (chlorine), trucks or fire-fighting equipment.

Most people understand that brass components performance are quite high, while the problem with a ball valve may arise from a component you would have never thought about: the aluminum T-handle.

To benefit of brass resistance to corrosion, **RuB** has developed brass T-handles.

Patented lockable handle

for **RuB** manual ball valves

The **RuB** lockable handle is made of strong Geomet® carbon steel and designed to discourage tampering. The **RuB** locking device covers the top nut of the valve making padlock removal impossible without a key. Easy to install on valves in the field, the **RuB** lockable handle will lock s.93 **RuB** valves in closed position only in compliance with OSHA (USA) safety requirements, while other **RuB** valves can be locked in both the open and closed positions.

Lockable only in closed position when assembled on s.93 **RuB** range

Lockable in both open and closed positions when assemble on any other **RuB** range

Dimension A shows handle length from center of stem; dimension h shows height of handle compared to standard handle assembled on valves. Two bottom lines show size of valve to fit with each size of lockable handle. Use 9/32" size shackle padlock up to 2", and 5/16" over.

Lockable handle

for 3-way ball valves series s.76 (L-port) and s.64/T.264
with ISO5211 F03 flange

Flange Size		F03
A (inch)		4.05
Black	Code	SLFD03

Description	Material
Geomet® plated steel handle	DD11 (EN10111)
Dipped coating	PVC
Stainless steel screw	AISI 304
Zinc plated steel nut	Class 8 (UNI7474)
Unplated stop	CW617N

This kit easily converts an actuated valve to a manual one.
To lock valve in any position, use 5/32" (4mm) shackle padlock.

Lockable push & turn handle

for 3-way ball valves series s.73 (T-port)
with ISO5211 F03 flange

Flange Size		F03
A (inch)		4.05
Black	Code	K73N13B

Description	Material
Geomet® plated steel handle	DD11 (EN10111)
Dipped coating	PVC
Screw	AISI 304
Retainer ring	CW617N
Spring	AISI 302
Pin	CW617N

To lock valve in any position, use 5/32" (4mm) shackle padlock.

Oval lockable handle

for **RuB** manual ball valves

PATENTED

The **RuB** oval/round lockable handle is for service where there isn't enough space for levers or T-handles, or where lever handles might be moved unintentionally.

It is made of steady carbon steel and it features the patented **RuB** lockable device.

The **RuB** oval lockable handle is available for all sizes of forged **RuB** valves up to 2" and in round shape for sizes 2 1/2" thru 4"; it is easy to install on valves in the field or you can simply order your **RuB** valves with this option.

Dimension A1 shows handle dimension from centre of stem. Dimension H1 shows height of handle compared to standard handle assembled on valves.

Memory stop

Use together with **RuB** stubby handles with knurling

Full port valve	1/4"÷3/8"	1/2"	3/4÷1"	1 1/4"÷2"
Standard port valve		1/2"÷3/4"	1"÷1 1/4"	1 1/2"÷2 1/2"
Code	PPMA03	PPMA03	PPMA06	PPMA09
Material (s)	DD11 (EN10111)			

Memory Stop allows to control flow passing through the valve by limiting ball movement from fully closed to a preset position. Installing a memory stop on a standard **RuB** valve is very easy and can be done even while valve is being used. Memory stops should be used only with **RuB** valves with O-Ring stem design.

Geomet® carbon steel stubby handle

Material (s)	DD11 (EN10111) + PVC			

RuB levers are not only strong, but also long for easy maneuver. To solve space constraints issues, install our stubbies.

Stem Extension

for **RuB** ball valves with O-ring stem design

Today's world is conscious of the energy savings required to maintain resources for the future. To avoid heat loss from insulated pipes, **RuB** offers stem extensions which provide easy operation over insulation.

RuB stem extensions are made of strong hot forged brass and are designed for low heat losses from the pipe to the ambient environment. They are easy to install on **RuB** valves even while valves are in service.

Dimensions Y, y, Y1 and y1 are additional to dimension H on the relevant valve drawing
